

SQL ASSIGNMENT

1. DDL (Data Definition Language) :

```
create database collegesystem;
```

```
use collegesystem;
```

```
create table students (  
    studentID int primary key,  
    name varchar (30),  
    department varchar (30),  
    age int  
);
```

2. DML (Data Manipulation Language) :

```
insert into students values (1,'sajani','CSE',17) , (2,'ananya','EEE',18) , (3,'nivas','ECE',19) ;
```

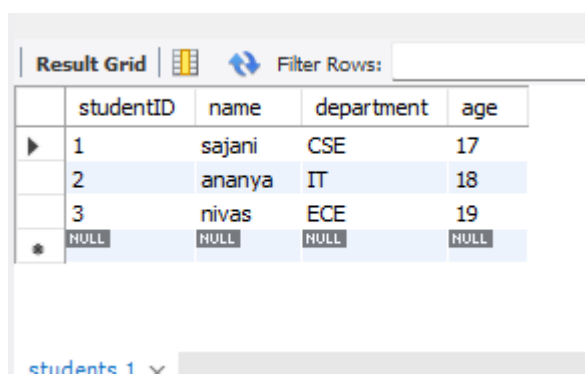

```
update students set department = 'IT' where studentID = 2 ;
```

3. DQL (Data Query Language) :

```
select * from students;
```

```
select * from students where department = 'CSE';
```

OUT PUT :

	studentID	name	department	age
▶	1	sajani	CSE	17
	2	ananya	IT	18
	3	nivas	ECE	19
*	NULL	NULL	NULL	NULL

students 1 x

Result Grid				
Filter Rows:				
	studentID	name	department	age
▶	1	sajani	CSE	17
✱	NULL	NULL	NULL	NULL

students 2 x

4. DCL (Data Control Language) :

```
create user 'staff1'@'localhost'identified by '1234';
grant select on students to 'staff1'@'localhost';
revoke select on students from 'staff1'@'localhost';
```

5. TCL (Transaction Control Language) :

```
start transaction;
update students set age = 20 where studentID = 3;
commit;
rollback;
```

OUT PUT :

Result Grid				
Filter Rows:				
	studentID	name	department	age
▶	1	sajani	CSE	17
	2	ananya	IT	18
	3	nivas	ECE	20
✱	NULL	NULL	NULL	NULL
